

GOOD BEHAVIOUR GAME - OFFLINE IMPLEMENTATION FIDELITY CHECKLIST

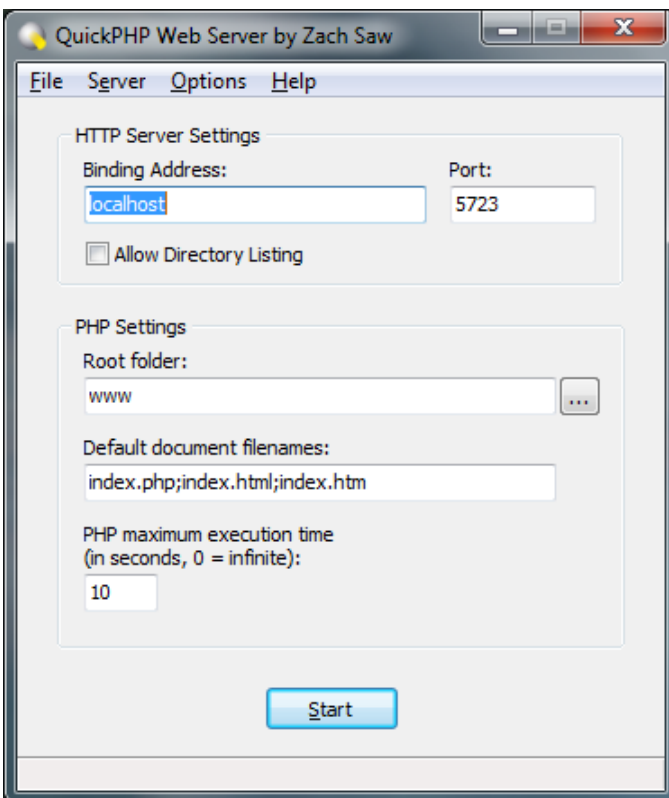

INSTALLATION

IMPORTANT: If upgrading, back up or rename your current *data.csv* file (in the *quickphp/www* folder) first!!

1. Download the zip file from <http://goodbehaviourgame.info/offline-v5.zip>
2. Extract the files keeping the file structure, so that there is a main *quickphp* folder and a *www* subfolder.

Name	Date modified	Type	Size
www	02/11/2015 13:27	File folder	
GBG checklist	06/11/2015 14:42	Internet Shortcut	1 KB
License and Readme.txt	15/06/2011 18:24	TXT File	1 KB
php_license.txt	23/08/2006 17:14	TXT File	4 KB
php5ts.dll	23/08/2011 12:59	Application extension	5,770 KB
QuickPHP.exe	25/03/2014 11:47	Application	1,144 KB
QuickPHP.ini	02/11/2015 13:28	Configuration settings	1 KB

3. Whenever you need to make an observation, run **QuickPHP.exe** and click the **Start** button:

4. Click the **GBG checklist** shortcut in the main folder to open up the page in your default web browser
 GBG checklist
5. Fill in and click the **Save observation** button at the bottom to write the data to file.
Each observation is appended as a new row to the **data.csv** file in the *www* folder.
Note 1: if you want to create charts or analyse this data, please save a copy of the data as an Excel (.xls/.xlsx) spreadsheet and leave this csv file alone for recording data.
Note 2: a webpage of the observation is saved too in the format **yyyy-mm-dd hhmmss – teacher.htm** but this is only as a more user-friendly format for reading – changes to this file cannot be saved.
6. Click **Stop** to close the web server before quitting **QuickPHP** when you have finished recording your observation(s).
